Education	2006 – 2010 IT College Estonia, Administering of IT systems
	1988 – 1992 University of Tartu, Physics Department
Competence	1977 – 1988 Tallinn 7. Secondary School

I have good understanding of linux and windows server systems, installing, troubleshooting and integrating into infrastructure. As virtualization needs grow, I have made myself familiar with vmware, KVM and XEN solutions. I've been involved in implementing network solutions (Cisco/Enterasys etc) and monitoring (Nagios scripting and SNMP based).   I have been working in IT and computing over 15 years.

Work experience

2006 – until now Tallinn, Estonian Defence Forces, IT specialist – Linuxi-based IS installation, implementation and integration into Windows server -based AD solution, Linux terminal server projects, monitoring with Nagios.

2002 – 2006 Tallinn, State Gazette, IT-manager – Consulting and building Electronic State Gazette project, management of State Gazette servers and network

1997 – 2002   Tallinn, AS Tipnette, IT specialist – Implementation and support of Hewlett-Packard server systems

I have written several articles for computing magazines (.EXE, Maatriks, 21).
I have been reading lectures about system administration using Linux in BCS.
